Omnisoft v1.0.1 - API v2.0.1

Omnisoft v1.0.1 - API v2.0.1 1
1. Release notes (12.04.22) 1
2. Compatibility 1
2.1. Configuration 1
2.1.1. Launch 1
2.2. Internet connectivity 2
2.3. Compatibility of “Omnicashier” with token version 2
3. How to API 3
Request: 3
Response: 3
4. Cashier instructions 3
5. Quick start (basic commands) 5
6. Commands detailed description 17
6.1.1. Get Info 17
Get info about token and last document number 17
"check_type" – 41 get info operation 17
Example: 17
6.1.2. Login 17
6.1.3. Shift status 18
6.1.4. Open shift 18
6.1.5. Creating documents Input parameters: 18
6.1.6. Description of some document fields: 18
6.1.8. Checking the characters used in the names of commodity items. 20
6.1.9. Advanced optional parameters: 21
Examples: 21
6.1.4.2. Sale: 21
6.1.4.3. Rollback: 22
6.1.4.4. Money back 22
6.1.4.5. Withdraw 22
6.1.4.6. Correction 22
6.1.4.7. Receipt copy 22
6.1.4.8. Response example 23
6.1.10. Receipt copy 26
6.1.11. Reprint after printing error 26
6.1.12. X-Report 26
6.1.13. Close shift & Z-Report 28
6.1.14. Transaction history 29
6.1.15. Statement for the requested period 31
7. Check creation basic situations 32
7.1. Payment types 32
7.1.1. Cash 32

7.1.2. Cashless 33
7.1.3. Credit 34
7.1.4. Sale with prepayment 36
7.1.5. Bonuses 37
7.1.6. Sale with Discount 37
7.1.7. Complex payment types 39
7.2. Taxation of products 40
7.2.1. Tax percentage 40
7.2.2. Products without tax 40
7.2.3. Products with different taxation 41
7.2.4. Income tax 42
7.3. Credit repayment 43
7.4. Prepayment 45
7.5. Money back 45
7.5.1. Moneyback of sale 45
7.6. Rollback 49
7.7. Correction 51
7.9. Tips 51
8. Documents validations **52**
8.1. Header 52
8.3. Money_back 53
8.5. Correction 57
10. API error codes 61

1. Release notes (12.04.22)

New features:

- Get info request added. You can get information about token with get info request, also get last document number
- Open & Close moneybox (cashbox) over API
- Prepay – prepay module added
- Credit – credit module added
- Login – now only authorized users can operate with API
- Shift status – return complete information about shift status and S/N of operated device
- Print three additional fields on sale receipts such as text, numbers, greetings, customer names, barcode with any needed information.
- Re-print check
- Re-print after printing error
- Internal reference can be used for tracking and validating transactions
- Z-Report & X-Report response with all data in report over API
- Transaction history
- Statement for the requested period

Release notes (18.08.2023)

- The "incomingSum" field has been added to the requests to display the amount of change on the receipt.

“incomingSum” - The amount of cash the buyer pays. The change will be calculated automatically.

Release notes (01.09.2024)

- The new fiscal driver, which complies with the latest requirements, has been installed.

2. Compatibility

“Omnicashier” software’s API receive JSON requests on an HTTP socket.
By default, port 8989, Ethernet interface is listened.

2.1. Configuration

Configure IP addresses on Ethernet network interface of the TPS575 device.
API link example 192.168.1.103:8989/v2

2.1.1. Launch

Launch API from the “Omnicashier” software, at login screen ***press API(or API v2) button.***

On Test units default users:
User: SuperApi
Password: 123
To obtain API grade user on Production units, please contact technical support via *1711.

2.2. Internet connectivity

TPS575 consumes ~ 1.5 Mb / s of network traffic for correct operation, where ½ is the initial traffic and ½ is the incoming traffic.
Under the condition of continuous intensive work (about 2 checks per minute) for a month, you will need up to 5GB of total traffic.

2.3. Compatibility of “Omnicashier” with token version

Modules "prepayment" and "credit" are available with tokens, that have firmware version higher than 2.18.0

3. How to API

Work with the service is carried out through the exchange of JSON messages over the HTTP socket with **POST** method.

Request:

```
{“requestData”:

{“tokenData”:
{
        “parameters”: {
                “param_1”: value_1,
                “param_2”: value_2,
                …
                “param_n”: value_n,
                “data”: doc_body_json
        },
        “operationId”:
        “operation_name”, “version”: 1
}
}
```

where:

- “parameters” – array of request parameters
- “param_1”, “param_2”, “param_n” – request parametrs
- “data” – document body, used in “createDocuments” operations
- value_1, value_2, value_n – request parameters value
- doc_body_json – document data in JSON format
- operationId – field where we indicate the operation to be performed
    - createDocument – create a check
    - getXReport – X-report generation
- “operation_name” – operation
- version” – API version
- 1 – current version of API

Response:

```
{
        “code”: some_code,
        “data”: {
                some JSON data
        },
        “message”: “some_message”,
        “info”: “some_info”
}
```

where:

- “code” – error/response code (mandatory)
- “data” – response data in JSON format (optional)
- “message” – response message (optional)
- “info” – additional information (optional)

4. Cashier instructions

1. **Open “Omnicashier” software, press API button on login screen, continue work from integrated software**.
   **If the API button is not available on the screen, please contact technical support via +994(12)310-1711*.

Cash Management Rules:

- Each day begins with the opening of the shift, followed by the deposit of money into the cash drawer, the day (shift) ends with its closing and the generation of the Z-report. The shift cannot exceed 24 hours.

- Several cashiers can work in one shift without closing it every time a new cashier arrives at the workplace.

- Cancellation check is applicable only to checks fiscalized (printed) within the current shift and is used to completely cancel a check in case of cashier error, lack of money from the buyer, etc.

- The day ends with a shift close operation that generates a Z-report.

- In the case of prepaid operation, the deposit is issued as a prepayment. Further, as the deposit is used, the prepayment is indicated as a payment method, and upon completion of the service, depending on the return policy, a return check for the balance is issued or not issued.

- To account for income tax, you need to transfer to the Ministry of Taxes the price of the purchase of products.

- Not all cash registers have the ability to obtain the purchase price of goods necessary for the sale of products subject to taxation under the trade allowance scheme, in which case the Ministry of Taxes suggests explicitly indicating that this tax will be paid separately for the means of providing additional information to the tax authorities. For this you need in the field send “itemVatPercent” as 0, “itemMarginPrice” and “itemMarginSum” send equal “itemPrice” and “itemSum” (in field “vatAmounts” 0%).

5. Quick start (basic commands)

Response of “Login” request will contain the “access_token” parameter, this is a session key which should be stored and used in all other operations. Also please note that parameters order should be kept within documentation.

To obtain an "access token," you need to make a Login request. ***The token changes if you navigate away from the API menu****, so you'll need to log in again to acquire a new "access_token" and continue with operations.*

6. Commands detailed description

6.1. Cashier

6.1.1. Get Info

Get info about token and last document number

"check_type" – 41 get info operation

Example:

Request	Response

{
"requestData": {
"checkData": {
"check_type": 41
},
"access_token": "HI01HpJe7mqPSSjl0e088A=="
}
}
	{
	"code": 0,
	"data": {
	"cashbox_factory_number": "2938742983741098248193",
	"cashbox_tax_number": "test_00234234",
	"cashregister_factory_number": "all",
	"cashregister_model": "AGR",
	"company_name": "\"OMNITECH\" MƏHDUD MƏSULİYYƏTLİ CƏMİYYƏTİ",
	"company_tax_number": "1231234",
	"firmware_version": "2.20.0",
	"last_doc_number": 2612,
	"last_online_time": "2022-03-09T06:40:21Z",
	"not_after": "2023-11-03T09:56:05Z",
	"not_before": "2020-11-03T09:55:35Z",
	"object_address": "Unvan",
	"object_name": "OFİS",
	"object_tax_number": "1238198274-1231",
	"qr_code_url": "https://monitoring.e-kassa.az/#/index?doc=",
	"state": "ACTIVE"
	},
	"message": "Successful operation"
	}

6.1.2. Login

Authorization

"name" – API grade account username

“password” – API grade account password

"check_type" – 40 Login operation

Example:

Request	Response

<table>
<tr>
<td>

```
{
  "requestData":{
   "checkData":{
   "check_type":40
   },
   "name":"SuperApi",
   "password":"123"
  }
}
```

</td>
<td>

```
{
   "access_token": "7dOF7HlXb/uG2J/FD+GtjA==",
   "code": 1,
   "message": "login success"
}
```

</td>
</tr>
</table>

6.1.3. Shift status

Shift and unit information

"check_type" – 14 Shift status operation

"access_token" – Session key generated during login operation

Example:

<table>
<tr><th>Request</th><th>Response</th></tr>
<tr>
<td>

```
{
  "requestData":{
   "checkData":{
   "check_type":14
   },
   "access_token":"7dOF7HlXb/uG2J/FD+GtjA=="
  }
}
```

</td>
<td>

```
{
   "code": 0,
   "desc": "shift is close",
   "message": "Successful operation",
   "serial": "2001G57500300007",
   "shiftStatus": false,
   "shift_open_time": ""
}
```

</td>
</tr>
</table>

6.1.4. Open shift

Open fiscal shift

"check_type" – 15 Open shift operation

"access_token" – Session key generated during login operation

Example:

<table>
<tr><th>Request</th><th>Response</th></tr>
<tr>
<td>

```
{
  "requestData":{
   "checkData":{
   "check_type":15
   },
   "access_token":"7dOF7HlXb/uG2J/FD+GtjA=="
  }
}
```

</td>
<td>

```
{
 "code":0,
  "message":"Successful operation"
}
```

</td>
</tr>
</table>

6.1.5. Creating documents

Input parameters:

"access_token" - (mandatory)
"check_type" – (mandatory), each operation in “Omnicashier” API, has it unique

- 7 – Deposit
- 1 – Sale
- 16 – Re-print after printing error
- 10 – Rollback
- 100 – Money back
- 8 – Withdraw
- 19 – Correction
- 31- Credit Pay
- 32 – Credit Rollback
- 100 – Credit Moneyback
- 34 – Prepay

"doc_type” - (mandatory), determines the type of document, depending on this parameter, the systems will check the structure of the document for compliance with the requirements

6.1.6. Description of some document fields:

6.1.7.

“itemCodeType” - type of product code, affects the interpretation of the value in the field “itemCode”, the following types are possible:

- 0 - plain text - arbitrary value
- 1 - EAN8 - barcode EAN8
- 2 - EAN13 - barcode EAN13
- 3 - service - service code
- 5- credit payment

“itemQuantity” - quantity of products, the only field in the protocol which may have 3 digits after the decimal point
"itemPrice" - the final price of the products, it should already take into account all possible discounts, nominally the rule must be observed items.itemPrice = items.sum / itemQuantity
“itemQuantityType” - products measuring units (optional)

- 0 - pieces
- 1 - kilograms
- 2 - liters
- 3 - meters
- 4 - square meters
- 5 - cube meters

“itemMarginPrice” - the difference between the sale and purchase prices is filled in if a comprehensive tax accounting is required (for example, for agriculture) (optional)1
“itemMarginSum” - the amount of value added in the value of the products (optional), где itemMarginSum=itemMarginPrice*itemQuantity)
“parentDocument” - full (not short) fiscal identifier of the parent document, according to which the operation of return or cancellation is performed
“sum” final amount to be paid by various payment methods, “sum” = ∑items(“itemSum”)), and “sum” = “cashSum”+“cashlessSum”+”bonusSum”
“cashSum” - Cash payment
“cashlessSum” - Cashless payment
“prepaymentSum” - Bonus or gift certificate payment
“creditSum” - Credit payment
”bonusSum” - Bonus payment
“incomingSum” - The amount of cash the buyer pays. The change will be calculated automatically.
“vatAmounts” - aggregated information about all possible interest rates of VAT participating in the check, where "vatAmounts" = select "itemVatPercent", sum("itemSum") from "items" group by "itemVatPercent", Please note that if the product is not subject to VAT and has no field "itemVatPercent", in "vatAmounts" such products will be summarized as a separate line without "vatPercent"
(“vatAmounts”:[{**"vatSum":"..."**},{"vatSum":"...","vatPercent":"..."},...])
"payment_type" – Payment type:

0 – Cash
1 – Cashless
2 – Bonuses
3 – Prepayment
5– Credit

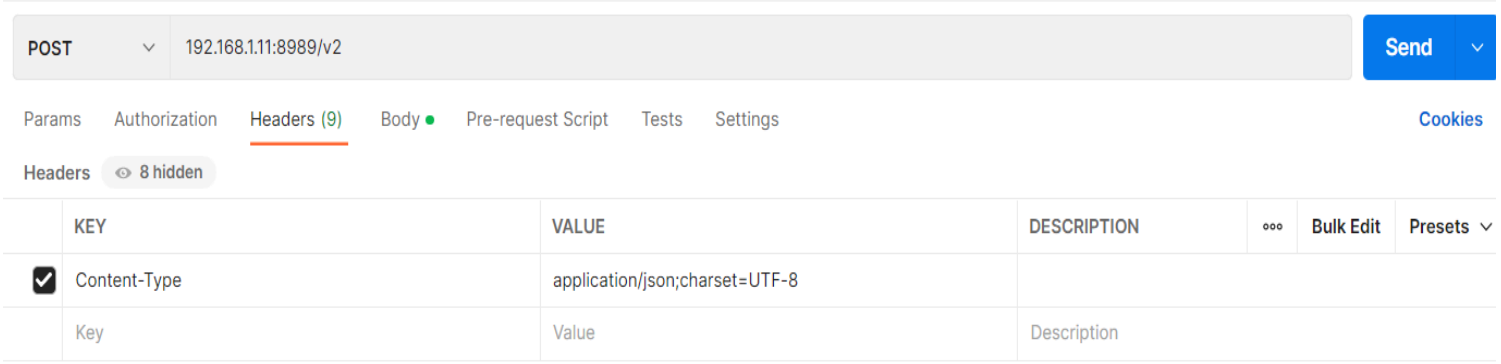

6.1.8. Checking the characters used in the names of commodity items.

The following symbols may be used in product names:

0123456789ABCDEFGHIJKLMNOPQRSTUVWXYZabcdefghijklmnopqrstuvwxyzАБВГДЕЁЖЗИЙКЛМНОПРСТУФХЦЧШЩЪЫЬЭЮЯабвгдеёжзийклмнопрстуфхцчшщъыьэюяҒƏЈҚӨҮһҶÇƏĞIİÖŞÜŸғəjкөүһҷçəğıİöşüÿ!@#$%^&*()_-+=/,.<>`~.

{"requestData":{"access_token":"AZcesC5rvTkPYWeSyRBc1g==","tokenData":{"parameters":{"doc_type":"sale","data":{"cashier":"Cashier","currency":"AZN","items":[{"itemName":"0123456789ABCDEFGHIJKLMNOPQRSTUVWXYZabcdefghijklmnopqrstuvwxyz!@#$%^&*()_-+=/,.<>`~","itemCodeType":1,"itemCode":"10526589200147","itemQuantityType":0,"itemQuantity":1,"itemPrice":1000,"itemSum":1000,"itemVatPercent":18,"discount":0}],"sum":1000,"cashSum":0,"cashlessSum":1000,"prepaymentSum":0,"creditSum":0,"bonusSum":0,"vatAmounts":[{"vatSum":1000,"vatPercent":18}]}},"operationId":"createDocument","version":1},"checkData":{"check_type":1}}}

To use specific letters of the Azerbaijani alphabet and letters of the Russian alphabet, the encoding format must be UTF-8.
In Postman it can be implemented as below:

{"requestData":{"access_token":"AZcesC5rvTkPYWeSyRBc1g==","tokenData":{"parameters":{"doc_type":"sale","data":{"cashier":"Cashier","currency":"AZN","items":[{"itemName":"0123456789ABCDEFGHIJKLMNOPQRSTUVWXYZabcdefghijklmnopqrstuvwxyzАБВГДЕЁЖЗИЙКЛМНОПРСТУФХЦЧШЩЪЫЬЭЮЯабвгдеёжзийклмнопрстуфхцчшщъыьэюяҒƏЈҚӨҮһҶÇƏĞIİÖŞÜŸғəjкөүһҷçəğıİöşüÿ!@#$%^&*()_-+=/,.<>`~","itemCodeType":1,"itemCode":"10526589200147","itemQuantityType":0,"itemQuantity":1,"itemPrice":1000,"itemSum":1000,"itemVatPercent":18,"discount":0}],"sum":1000,"cashSum":0,"cashlessSum":1000,"prepaymentSum":0,"creditSum":0,"bonusSum":0,"vatAmounts":[{"vatSum":1000,"vatPercent":18}]}},"operationId":"createDocument","version":1},"checkData":{"check_type":1}}}

6.1.9. Advanced optional parameters:

Internal Reference:

"int_ref" – (optional) This parameter used if you need to track and verify request custom transaction ID, received from integrated software. Results will be available due Transaction history operation. All transactions will have parameter "int_ref" with your values.

Additional printing fields:

**Maximal count of fields per receipt equal four. Only one barcode can be printed at the time. All other types of fields can be printed in total up to three times with different data*

"t" – Type:

0 – Raw data (with this parameter "k" – always should be blank "k":"")

1 – "k" data will be printed on left side as a key description.

2 – Barcode (with this parameter "k" as numbers, numbers coded in barcode will be also printed under barcode)

3 – Qr-code (with this parameter "k" – always should be blank "k":"", value of "v" will be generated to qr-code)

"k" – This parameter used as a description printed field when "t" parameter equal 1

"v" – Values, can be any values. If parameter "t" set as 2, the data on receipt will be represented as a barcode.

Examples:

6.1.4.1. Deposit:

Cash deposit receipt.

{"requestData":{"access_token":"7dOF7HlXb/uG2J/FD+GtjA==","tokenData":{"parameters":{"data":{"cashSum":10.0}}},"checkData":{"check_type":7}}}

6.1.4.2. **Sale**:

Sale receipt.

{"requestData":{"access_token":"7dOF7HlXb/uG2J/FD+GtjA==",
"int_ref":"123456",
"tokenData":{"parameters":{"doc_type":"sale","data":{"cashier":"Mask","currency":"AZN","items":[{"itemName":"Shirt","itemCodeType":1,"itemCode":"1564854651","itemQuantityType":0,"itemQuantity":2.0,"itemPrice":50.0,"itemSum":100.0,"itemVatPercent":18.0,"discount":0.0},{"itemName":"Trousers","itemCodeType":2,"itemCode":"1894981988","itemQuantityType":0,"itemQuantity":1.0,"itemPrice":100.0,"itemSum":100.0,"itemVatPercent":18.0,"discount":0.0}],"sum":200.0,"cashSum":100.0,"cashlessSum":100.0,"prepaymentSum":0.0,"creditSum":0.0,"bonusSum":0.0,"incomingSum":100.0,"vatAmounts":[{"vatSum":200.0,"vatPercent":18.0}]}},"operationId":"createDocument","version":1},"checkData":{"check_type":1}},"receiptDetails":[{"t":0,"k":"","v":"Please keep this receipt"},{"t":1,"k":"Number","v":"new number"},{"t":2,"k":"Number","v":"5258645"}]}

6.1.4.3. Rollback:

Receipt of cancellation of sales check in the framework of the current open fiscal shift. Request should contain the "long_id" of sale receipt in "fiscalId" parameter.

{"requestData":{"access_token":"7dOF7HlXb/uG2J/FD+GtjA==","checkData":{"check_type":10},"fiscalId":"9mcZobUYvqnnsmxxF1JpTg9uNkCgT6na6Q833SQiBLBh"}}

6.1.4.4. Money back

The return receipt of the goods sold in both currently open and already closed fiscal shifts.

"parentDocument" – The **long_id** of the original sale receipt.

"refund_document_number" – The number of the original sale document.

"refund_short_document_id" – The **short_id** of the original sale document.

{"requestData":{"access_token":"7dOF7HlXb/uG2J/FD+GtjA==","tokenData":{"o
pe
rationId":"createDocument","parameters":{"data":{"bonusSum":0.0,"cashSum":0.0
,"
cashier":"fad","cashlessSum":25.0,"creditSum":0.0,"currency":"AZN","items":[{"d
iscount":0.0,"itemCode":"225555","itemCodeType":0,"itemName":"test","itemPric
e":25.0,"itemQuantity":1.0,"itemQuantityType":0,"itemSum":25.0,"itemVatPercent
":18.0}],"parentDocument":"63YNLNiaWkFS9Q7XXwEY4fD25LiMEU2eE6xto
APXXDju","prepaymentSum":0.0,"refund_document_number":"1","refund_short_
document_id":"63YNLNiaWkFS","sum":25.0,"vatAmounts":[{"vatPercent":18.0,"
vatSum":25.0}]},"doc_type":"money_back"},"
version":1},"checkData":{"check_type":100}}}

6.1.4.5. Withdraw

Cash withdrawal receipt.

{"requestData":{"access_token":"7dOF7HlXb/uG2J/FD+GtjA==","tokenData":{"par
ameters":{"data":{"cashSum":10.0}}},"checkData":{"check_type":8}}}

6.1.4.6. Correction

Correction receipt in case of non-inclusion of information to the fiscal device.

{"requestData":{"access_token":"7dOF7HlXb/uG2J/FD+GtjA==","tokenData":{"par
ameters":{"doc_type":"correction","data":{"cashier":"Masha","firstOperationAtUtc":
"2020-01-07T08:00:00Z","lastOperationAtUtc":"2020-01-

"prepaymentSum":0.0,"creditSum":0.0,"bonusSum":0.0,"vatAmounts":[{"vatSum":1
00.0,"vatPercent":18.0}]}},"operationId":"createDocument","version":1},"checkData
":{"check_type":19}}}

6.1.4.7. Receipt copy

Printing receipt copy.
Request should contain the “long_id” of sale receipt in "fiscalId" parameter.

{"requestData":{"access_token":"7dOF7HlXb/uG2J/FD+GtjA==","checkData":{"ch
eck_type":11},"fiscalId":"9mcZobUYvqnnsmxxF1JpTg9uNkCgT6na6Q833SQiBLB
h"}}

6.1.4.8. Response example

{
"code": 0,
"document_number": 27,
"long_id": "BX2RFjuzMF1v3j7bpSh6pnkLt4AYVXBAKnRRwmgKoqKP",
"message": "Successful operation",
"shift_document_number": 3,
"short_id": "BX2RFjuzMF1v"
}

6.1.4.9. Credit sale:

Credit sale receipt. Request should contain "creditContract" field and only one item for sale.

{"requestData":{"access_token":"r4q+GSuah8E5GDJOEndTJg==","tokenData":{"p
arameters":{"doc_type":"sale","data":{"cashier":"Superman","currency":"AZN","cre

6.1.4.13. Prepay

Prepay receipt.

{"requestData":{"access_token":"8FTwG3WeLob6RfE69+RnxQ==","tokenData":{"parameters":{"doc_type":"prepay","data":{"cashier":"Mask","currency":"AZN","items":[{"itemName":"Gift card","itemCodeType":1,"itemCode":"1894981988","itemQuantityType":0,"itemQuantity":3,"itemPrice":100,"itemSum":300,"itemVatPercent":18}],"sum":300,"cashSum":100,"cashlessSum":100,"bonusSum":100,"creditSum":0,"incomingSum":100.0,"vatAmounts":[{"vatSum":300,"vatPercent":18}]}},"operationId":"createDocument","version":1},"checkData":{"check_type":34}}}

6.1.4.14. Prepay with multiple items

Prepay amount could be different, than total price of items.

{"requestData":{"access_token":"{{access_token}}","tokenData":{"parameters":{"doc_type":"prepay","data":{"cashier":"Mask","currency":"AZN","items":[{"itemName":"Monitor","itemCodeType":0,"itemCode":"1564854651","itemQuantityType":0,"itemQuantity":1,"itemPrice":100,"itemSum":100,"itemVatPercent":18,"discount":0},{"itemName":"HDD storage","itemCodeType":0,"itemCode":"15648234651","itemQuantityType":0,"itemQuantity":1,"itemPrice":100,"itemSum":100,"itemVatPercent":18,"discount":0},{"itemName":"Cooler","itemCodeType":0,"itemCode":"1564854651","itemQuantityType":0,"itemQuantity":1,"itemPrice":100,"itemSum":100,"itemVatPercent":18,"discount":0}],"sum":100,"cashSum":100,"cashlessSum":0,"prepaymentSum":0,"creditSum":0,"bonusSum":0,"incomingSum":100.0,"vatAmounts":[{"vatSum":100,"vatPercent":18}]}},"operationId":"createDocument","version":1},"checkData":{"check_type":34}}}

6.1.4.15. Sale with prepay.

Sale with prepay receipt. Request should contain the “long_id” of prepay receipt in "parents" parameter.

{"requestData":{"access_token":"DjBtF0SILkc9Az5SixZAqA==","tokenData":{"parameters":{"doc_type":"sale","data":{"cashier":"Mask","currency":"AZN","parents":["9KxKAqMbN7yZnfMsPxKjoboUvuzERbFnZqkTwrmg2B17"],"items":[{"itemName":"Shirt","itemCodeType":1,"itemCode":"1564854651","itemQuantityType":0,"itemQuantity":1,"itemPrice":100,"itemSum":100,"itemVatPercent":18,"discount":0}],"sum":0,"cashSum":0,"cashlessSum":0,"prepaymentSum":100,"creditSum":0,"bonusSum":0,"incomingSum":0.0,"vatAmounts":[{"vatSum":0,"vatPercent":18}]}},"operationId":"createDocument","version":1},"checkData":{"check_type":1}}}

6.1.4.16. MoneyBack of prepay residue.

MoneyBack of prepay residue receipt. Request should contain the “long_id” of prepay receipt in "parents" parameter, "moneyBackType" should be equal to 6. Items fields should be same with prepay receipt, but “sum” and “vatSum” equal to

refunded amount.

{"requestData":{"access_token":"59DStq9Iis14WAdbXUAQFA==","tokenData":{"operationId":"createDocument","parameters":{"data":{"sum":200,"cashSum":100,"cashlessSum":100,"bonusSum":0,"cashier":"fad","creditSum":0,"currency":"AZN","moneyBackType":6,"firstOperationAtUtc":"","items":[{"itemName":"Podarocniy sertifikat","itemCodeType":1,"itemCode":"1564854651","itemQuantityType":0,"itemQuantity":1,"itemPrice":300,"itemSum":300,"itemVatPercent":18,"discount":0}],"lastOperationAtUtc":"","parentDocument":"9KxKAqMbN7yZnfMsPxKjoboUvuzERbFnZqkTwrmg2B17","prepaymentSum":0,"refund_document_number":"1","refund_short_document_id":"9KxKAqMbN7yZ","vatAmounts":[{"vatSum":200,"vatPercent":18}]},"doc_type":"money_back"},"version":1},"checkData":{"check_type":100}}}

6.1.4.17. MoneyBack of prepay with multiple items

Key value for current operation "moneyBackType":6, other data same with prepay receipt.

{"requestData":{"access_token":"{{access_token}}","tokenData":{"operationId":"createDocument","parameters":{"data":{"sum":100,"cashSum":100,"cashlessSum":0,"bonusSum":0,"cashier":"fad","moneyBackType":6,"creditSum":0,"currency":"AZN","firstOperationAtUtc":"","items":[{"itemName":"Monitor","itemCodeType":0,"itemCode":"1564854651","itemQuantityType":0,"itemQuantity":1,"itemPrice":100,"itemSum":100,"itemVatPercent":18,"discount":0},{"itemName":"HDD storage","itemCodeType":0,"itemCode":"15648234651","itemQuantityType":0,"itemQuantity":1,"itemPrice":100,"itemSum":100,"itemVatPercent":18,"discount":0},{"itemName":"Cooler","itemCodeType":0,"itemCode":"1564854651","itemQuantityType":0,"itemQuantity":1,"itemPrice":100,"itemSum":100,"itemVatPercent":18,"discount":0}],"lastOperationAtUtc":"","parentDocument":"9x4eDAw9wYMhSeNhozeFqmeW7Sf5tceAPAySfPs7Avop","prepaymentSum":0,"refund_document_number":"3288","refund_short_document_id":"9x4eDAw9wYMh","vatAmounts":[{"vatSum":100,"vatPercent":18}]},"doc_type":"money_back"},"version":1},"checkData":{"check_type":100}}}

6.1.4.18. Open & Close the cashbox.

Open and close the cashbox receipt.
If “check_type” equal 28, then cashbox will open, if “check_type” equal 29, then will close.

{
"requestData":
{
"checkData":
{
"check_type":29
}
}
}

6.1.10. Receipt copy

Reprint any receipt's copy. "Long_ID" of a receipt should be presented as a "fiscalId" parameter.

"check_type" – 11 Receipt copy operation

"access_token" – Session key generated during login operation

"fiscalId" – long_id of needed document

Example:

Request	Response

{
"requestData":{
"access_token":"7dOF7HlXb/uG2J/FD+GtjA==",
"checkData":{
"check_type":11
},
"fiscalId":"9mcZobUYvqnnsmxxF1JpTg9uNkCgT6na6Q833SQiBLBh"
}
}
	{
	"code": 0,
	"document_number": 30,
	"long_id": "BAV7Ux1YdeJfN6aXbybyCSqsZjD7ZEKb1FbxkM5ZdzUM",
	"message": "Successful operation",
	"shift_document_number": 6,
	"short_id": "BAV7Ux1YdeJf"
	}

6.1.11. Reprint after printing error

Reprint half-printed receipt after paper renewal

"check_type" – 16 Reprint after printing error operation

"access_token" – Session key generated during login operation

Example:

Request	Response

{
"requestData":{
"checkData":{
"check_type":16
},
"access_token":"7dOF7HlXb/uG2J/FD+GtjA=="
}
}
	{
	"code":0,
	"message":"Successful operation"
	}

6.1.12. X-Report

Printing & obtaining X-Report

"check_type" – 12 X-Report operation

"access_token" – Session key generated during login operation

Example:

Request	Response

```
{
  "requestData":{
    "access_token":"7dOF7HlXb/uG2J/FD+GtjA==",
    "checkData":{
      "check_type":12
    }
  }
}

  }
 ]
}
```

7.2.4. Income tax

An income tax has been introduced for some categories of products, which requires a separation of the marginal part and cost, where the marginal part is taxed in accordance with the percentage of taxation, part of the cost is not taxed.

```
{
 "requestData":{
  "access_token":"7dOF7HlXb/uG2J/FD+GtjA==",
  "int_ref":"123456",
  "tokenData":{
   "parameters":{
   "doc_type":"sale",
   "data":{
      "cashier":"Givi",
      "currency":"AZN",
      "items":[
        {
         "itemName":"Картошка",
         "itemCodeType":1,
         "itemCode":"15648552",
         "itemQuantity":2.5,
         "itemPrice":4.0,
         "itemSum":10.0,
         "itemVatPercent":18.0,
         "itemMarginPrice":0.5,
         "itemMarginSum":2.0
        }
      ],
      "sum":10.0,
      "cashSum":0.0,
      "cashlessSum":10.0,
      "prepaymentSum":0.0,
      "creditSum":0.0,
      "bonusSum":0.0,
      "incomingSum": 0.0,
      "vatAmounts":[
        {
         "vatSum":2.0,
         "vatPercent":18.0
        }
      ]
    }
   },
   "operationId":"createDocument",
   "version":1
  },
  "checkData":{
   "check_type":1
  }
 },
 "receiptDetails":[
  {
   "t":0,
   "k":"",
   "v":"Please keep this receipt"
  },
  {
   "t":1,
   "k":"Number",
   "v":"new number"
  },
  {
   "t":2,
   "k":"Number",
   "v":"5258645"
  }
```

```
  ]
}
```

7.3. Credit repayment

For credit repayment check, the product type is indicated as a credit ("itemCodeType": 5), loan repayment is executed without a tax percentage. "paymentNumber" shows the serial number of the receipt of credit payment. "residue" is residue from the total amount of credit. "incomingSum" is actually deposited money.
"incomingSum" = “sum” + “changeSum”.
“vatSum” = “sum” = “cashSum” + “cashlessSum” + “bonusSum”
If payment type is cashless, then “incomingSum” = 0

```
{
  "requestData": {
    "access_token": "v9eu7ofO+/schwZsE6OOrQ==",
    "tokenData": {
      "parameters": {
        "doc_type": "creditpay",
        "data": {
          "cashier": "Masha",

      "k": "Number",
      "v": "5258645"
    }
  ]
}
```

7.4. Prepayment

To generate a receipt for the purchase of a gift certificate, the payment type is indicated based on the buyer's method of payment. When using a gift certificate, the amount spent from the certificate is specified as an prepayment, and no tax is applied to it.

```
{
 "requestData":{
  "access_token":"7dOF7HlXb/uG2J/FD+GtjA==",
  "tokenData":{
   "parameters":{
    "doc_type":"prepay",
    "data":{
     "cashier":"Givi",
      "currency":"AZN",
      "items":[
       {
        "itemName":"Gift certificate",
        "itemCodeType":1,
        "itemCode":"13245",
        "itemQuantity":1.0,
        "itemPrice":20.0,
        "itemSum":20.0,
        "itemVatPercent": 18
       }
      ],
      "sum":20.0,
      "cashSum":0.0,
      "cashlessSum":20.0,
      "prepaymentSum":0.0,
      "creditSum":0.0,
      "bonusSum":0.0,
      "incomingSum": 0.0,
      "vatAmounts":[
       {
        "vatSum":20.0,
        "vatPercent": 18
       }
      ]
     }
    },
    "operationId":"createDocument",
    "version":1
   },
   "checkData":{
    "check_type": 34
   }
  },
  "receiptDetails":[
   {
    "t":0,
    "k":"",
    "v":"Please keep this receipt"
   },
   {
    "t":1,
    "k":"Number",
    "v":"new number"
   },
   {
    "t":2,
    "k":"Number",
    "v":"5258645"
   }
  ]
}
```

7.5. Money back

7.5.1. Moneyback of sale

The money back should be issued only on the document previously generated and only on the previously sold products (you must specify the number of the sales receipt for which the return is carried out and information about the returned product, similar to its sale).

```
{
 "requestData":{
  "access_token":"7dOF7HlXb/uG2J/FD+GtjA==",
  "tokenData":{
   "operationId":"createDocument",
   "parameters":{
    "data":{
     "bonusSum":0.0,
     "cashSum":0.0,
     "cashier":"fad",
     "cashlessSum":25.0,
     "creditSum":0.0,
     "currency":"AZN",
     "firstOperationAtUtc":"",
     "items":[
      {
       "discount":0.0,
       "itemCode":"225555",
       "itemCodeType":0,
       "itemName":"test",
       "itemPrice":25.0,
       "itemQuantity":1.0,
       "itemQuantityType":0,
       "itemSum":25.0,
       "itemVatPercent":18.0
      }
     ],
     "lastOperationAtUtc":"",
     "parentDocument":"63YNLNiaWkFS9Q7XXwEY4fD25LiMEU2eE6xtoAPXXDju",
     "prepaymentSum":0.0,
     "refund_document_number":"1",
     "refund_short_document_id":"63YNLNiaWkFS",
     "sum":25.0,
     "vatAmounts":[
      {
       "vatPercent":18.0,
       "vatSum":25.0
      }
     ]
    },
    "doc_type":"money_back"
   },
   "version":1
  },
  "checkData":{
   "check_type":100
  }
 }
}
```

7.5.2. MoneyBack of credit pay

The return receipt of the goods sold in both currently open and already closed fiscal shifts. Request should contain the “long_id” of credit pay receipt in "parentDocument" parameter. Request should contain the "short_id" of credit pay document in “refund_short_document_id" parameter. "check_type": should be 100 and "moneyBackType":7. “Items” contain data from original parent document, but payment fields should be equal to refunded money.

```
{
   "requestData": {
      "access_token": "+JMgGPshzQluDV5KdvtvgA==",
      "tokenData": {
         "operationId": "createDocument",

    }
}
```

7.5.4 MoneyBack of Income Tax Products

An income tax has been introduced for some categories of products, which requires a separation of the marginal part and cost, where the marginal part is taxed in accordance with the percentage of taxation, part of the cost is not taxed. Due to this reason, in the refund request as well, the amounts subject to Value Added Tax (VAT) and the amounts without VAT should be indicated separately as follows:

```
{

   "requestData": {
            "access_token": " SrZwcTcWKtLOk++rkgMwBg==",
            "tokenData": {
                  "operationId": "createDocument",
                  "parameters": {
                      "data": {
                       "bonusSum": 0.0,

                   }

                   }

   }
```

7.6. Rollback

7.6.1. Sale Rollback

Rollback should be executed only on a document previously generated as part of the current shift (you must specify the long_id(long fiscal ID) number of the sales receipt, which will be canceled).

```
 {
"requestData":{
 "access_token":"7dOF7HlXb/uG2J/FD+Gtj
 A==", "checkData":{
 "check_type":10
 },
 "fiscalId":"9mcZobUYvqnnsmxxF1JpTg9uNkCgT6na6Q833SQiBLBh"
 }
 }
```

7.6.2. CreditPay Rollback

Credit rollback receipt. Receipt of cancellation of credit pays check in the framework of the current open fiscal shift. Request should contain the “long_id” of credit pay receipt in "fiscalId" parameter. "check_type" should be 32

```
{
  "requestData": {
    "access_token": "{{access_token}}",
    "tokenData": {
      "parameters": {
        "doc_type": "rollback",
        "data": {
          "cashier": "Givi",
          "currency": "AZN",
          "parentDocument": "7npC1DqpFMpSFPMGfwzG3Z5uLKYxPyoGC2CEm2z5bvmF",
          "sum": 100.00,
          "cashSum": 50.00,
          "cashlessSum": 50.00,
          "prepaymentSum": 0,
          "creditSum": 0,
          "bonusSum": 0,
          "items": [
            {
              "itemName": "Samsung TV 55 inch",
              "itemCodeType": 1,
              "itemCode": "1894981988",
              "itemQuantityType": 0,
              "itemQuantity": 1,
              "itemPrice": 1000.00,
              "itemSum": 1000.00,
              "itemVatPercent": 18,
              "itemMarginPrice": null,
              "itemMarginSum": null
            }
          ],
          "vatAmounts": [
            {
              "vatSum": 100,
              "vatPercent": 18
            }
          ]
        }
      },
      "operationId": "createDocument",
      "version": 1
    },
    "checkData": {
      "check_type": 32
    }
  }
}
```

7.6.3. CreditSale& Sale with prepay Rollback

CreditSale and Sale with prepay rollback receipt.
Receipt of cancellation of creditSale and sale with prepay check in the framework of the current open fiscal shift. Request should contain the "long_id" of creditSale or sale with prepay receipt in "parentDocument " parameter. "check_type" should be 32

```
{
  "requestData": {
    "access_token": "{{access_token}}",
    "tokenData": {
      "parameters": {
        "doc_type": "rollback",
        "data": {
          "cashier": "Givi",
          "currency": "AZN",
          "parentDocument": "CxaYWzkcQQrmVjc4qJ4zJi5Xgsna9R1Pk7AyEeZo44AK",
          "sum": 0,
          "cashSum": 0,
          "cashlessSum": 0,
          "prepaymentSum": 1000.00, // if Sale with prepay else 0
          "creditSum": 1000.00, //if creditSale else 0
          "bonusSum": 0,
          "items": [
            {
              "itemName": "Samsung TV 55 inch",
              "itemCodeType": 1,
              "itemCode": "1894981988",
              "itemQuantityType": 0,
              "itemQuantity": 1,
              "itemPrice": 1000.00,
              "itemSum": 1000.00,
              "itemVatPercent": 18
            }
          ],
          "vatAmounts": [
            {
              "vatSum": 0,
              "vatPercent": 18
            }
          ]
        }
      },
      "operationId": "createDocument",
      "version": 1
    },
    "checkData": {
      "check_type": 32
    }
  }
}
```

7.7. Correction

The correction operation is carried out in the case of sales without a cash register due to an accident and includes aggregated information about all operations without a cash register for the emergency period.

```
{
 "requestData":{
  "access_token":"7dOF7HlXb/uG2J/FD+GtjA==",
  "tokenData":{
   "parameters":{
    "doc_type":"correction",
    "data":{
    "cashier":"Masha",
     "firstOperationAtUtc":"2020-01-07T08:00:00Z",
     "lastOperationAtUtc":"2020-01-08T14:00:00Z",
     "currency":"AZN",
     "sum":100.0,
     "cashSum":50.0,
     "cashlessSum":50.0,
     "prepaymentSum":0.0,
     "creditSum":0.0,
     "bonusSum":0.0,
```

```
        "vatAmounts":[
          {
           "vatSum":100.0,
           "vatPercent":18.0
          }
        ]
       }
      },
      "operationId":"createDocument",
      "version":1
    },
    "checkData":{
     "check_type":19
    }
  }
}
```

7.8. Cashbox operations

This operations supported only in TPS575. The cashbox is connected to the cash register through the RJ-11 cable. “check_type” field determine type of operation.

7.8.1. Open the cashbox.

“check_type”:28 – open the cashbox

```
{
 "requestData":
   {
    "checkData":
      {
       "check_type":28
      }
   }
}
```

7.8.2. Close the cashbox

“check_type”:29 – open the cashbox

```
{
 "requestData":
   {
    "checkData":
      {
       "check_type":29
      }
   }
}
```

7.9. Tips

Tipping is made together with other products as a separate service (product). The gratuities indicated in the check are considered to be payment for the service and tax is deducted from them in accordance with the interest rate applied at the facility.

```
{
 "requestData":{
   "access_token":"7dOF7HlXb/uG2J/FD+GtjA==",
   "tokenData":{
    "parameters":{
     "doc_type":"sale",
     "data":{
     "cashier":"Givi",
      "currency":"AZN",
      "items":[
       {
        "itemName":"Шашлык",
        "itemCodeType":1,
        "itemCode":"15648594",
        "itemQuantity":0.415,
        "itemPrice":100.0,
        "itemSum":41.5,
        "itemVatPercent":8.0
       },
       {
        "itemName":"Чаевые-10%",
        "itemCodeType":3,
        "itemCode":"1",
        "itemQuantity":1.0,
```

```
            "itemPrice":4.15,
            "itemSum":4.15,
            "itemVatPercent":8.0
           }
          ],
          "sum":45.65,
          "cashSum":45.65,
          "cashlessSum":0.0,
          "prepaymentSum":0.0,
          "creditSum":0.0,
          "bonusSum":0.0,
          "incomingSum": 50.0,
          "vatAmounts":[
           {
            "vatSum":45.65,
            "vatPercent":8.0
           }
          ]
         }
        },
        "operationId":"createDocument",
        "version":1
       },
       "checkData":{
        "check_type":1
       }
      }
}
```

About Operations

Operation Name	
1. Withdraw	The operation of withdrawing money from the cash drawer
2. Correction	Correction operation in case of not entering information into the token (in case when cashbox unavailable for sale an was postpound on later)

8. Documents validations

8.1. Header

Rule	**Note**
Currency	AZN
No negative amounts	

Cashier name "cashier" maximum length	64

8.2. Sale

Rule	Note
Additional printing fields maximum lenght	36
Quantity of commodity items	1 <= N <= 201
Product Code Type Valid Values Only	[0,1,2,3,4,5]
Product Code Maximum Length	32
All percent of taxes listed in the product's "items" should be listed in the tax section "vatAmounts"	
Rounding within the heading no more than 0.01 for each unit of the products	| items.sum - items.itemPrice * itemQuantity | <= 0.01 * itemQuantity + 0.01
Total rounding for sum of units "itemSum" should not exceed 0.01	
The check amount is precisely detailed by various payment methods	Sum = cashSum+cashlessSum+b onusSum
The check amount is precisely detailed in the tax section "vatAmounts"	| Sum - sum(vatAmounts.vatSum) | <= 0.01
Tax amounts listed in "vatAmounts" correspond to the amounts of taxes indicated in "items"	
The amount of margin does not exceed the value of the products	itemMarginSum <= itemSum
Product margin is not more than the cost of products	itemMarginPrice <= itemPrice
Correspondence of the amount of margin and margin difference	| itemMarginSum-itemMarginPrice * itemQuantity | <= 0.01 * itemQuantity + 0.01
PrepaymentSum and CreditSum doesn't affect to sum and varSum.	

8.3. Money_back

Rule	Note
Quantity of commodity items	1 <= N <= 201

The maximum length of the fiscal identifier of the document to be returned	64
Product code type valid values only	[0,1,2,3,4,5]
Product Code Maximum Length	32
All percent of taxes listed in the product’s "items" should be listed in the tax section "vatAmounts"	

Rounding within the heading no more than 0.01 for each unit of the products	| items.sum - items.itemPrice * itemQuantity | <= 0.01 * itemQuantity + 0.01
Rounding is permissible for each heading not more than 0.01	| all(items.sum) - Sum | <= count_of_items/100
Amount is precisely detailed by various payment methods	Sum = cashSum+cashlessSum+prepaymentSum+creditSum+bonusSum
The check amount is precisely detailed in the tax section "vatAmounts"	| Sum - sum(vatAmounts.vatSum) | <= 0.01
Tax amounts listed in "vatAmounts" correspond to the amounts of taxes indicated in "items"	
The amount of margin does not exceed the value of the products	itemMarginSum <= itemSum
Product margin is not more than the cost of products	itemMarginPrice <= itemPrice
Correspondence of the amount of margin and margin difference	| itemMarginSum-itemMarginPrice * itemQuantity | <= 0.01 * itemQuantity + 0.01
On money back of creditpay, request should contain “moneyBackType:7” parameter, “items” array should have parameters from original credit sale document, but “data” array should take same parameter from creditpay document.	"moneyBackType": 7.
On money back of sale with prepayment, goods can be returned in cash, cashless and bonus.	"prepaymentSum": 0.0

8.4. Rollback

Rule	**Note**
The maximum length of the fiscal identifier of the document to be returned	64
Amount is precisely detailed by various payment methods	Sum = cashSum+cashlessSum+prepaymentSum+creditSum+bonusSum
The check amount is precisely detailed in the tax section "vatAmounts"	| Sum - sum(vatAmounts.vatSum) | <= 0.01

8.5. Correction

Rule	**Note**
Amount is precisely detailed by various payment methods	Sum = cashSum+cashlessSum+bonusSum

Amount is precisely detailed by various payment methods	Sum = cashSum+cashlessSum+bonusSum
The check amount is precisely detailed in the tax section "vatAmounts"	| Sum - sum(vatAmounts.vatSum) | <= 0.01

9. Token information & error codes

0 operation success
101 generic initialization error
102 init hal drivers failed
103 init hal rcc failed
104 init hal rcc clock failed
105 init hal fram (fast memory) driver failed
